Niagara Falls, NY 14304-9998

January 23, 2013

Dear Mr. Wakeman:

Re: Extension of Failure Rate, MIL-PRF-55342; VQP-13-025710
CN 038003

As a result of additional qualification testing to Military Specification MIL-PRF-55342, resistors, FSC 5905, the failure rate level for your P series chip resistors is extended to include level "S". Therefore, the next revision or amendment of Qualified Products List (QPL) 55342 will indicate failure rate levels M, P, R, and S for these products.

Test report number 55342-3766-13 has been assigned to your test data and will become a permanent part of our records. This test report number will be referenced in QPL 55342.

Because we are held responsible for the accuracy and currency of this QPL, your company must let us know if it discontinues production of this product.

If you have any questions concerning this letter, please contact Mr. Jeff Zern, 614-692-0597.

Sincerely,

/SIGNED/

JOSEPH GEMPERLINE
Chief
Sourcing and Qualifications Division
